## SUMMARY

Recent graduate with a strong interest in video games and a sharp attention to detail, seeking an entry-level game tester position. Eager to leverage my analytical skills and passion for gaming to identify bugs, improve gameplay, and contribute to the creation of high-quality gaming experiences.

---

## RELEVANT GAMING EXPERIENCE:

- I am Actively playing BGMI for the past 5 years .
  - developed a deep understanding of in-game mechanics, weapon behavior, and strategy across different game modes and maps.
  - Familiar with popular mobile games like *Dream League Soccer* , *Call of Duty: Mobile*, and PC titles across various genres.
  - Familiarity with popular PC games like *PUBG* and *GTA*.
  - Understanding of different game mechanics, user interfaces, and platform-specific features.
  - Familiar with adapting to new game updates and mechanics.
- 

## WORK EXPERIENCE:

### YCS Techsoft Pvt. Ltd. — Intern Front End Developer — November 2023 - Present

- Independently designed and developed the backend system for a restaurant website using Laravel, resulting in a 30% reduction in order processing time and supporting over 100 daily user requests.
- Architected and implemented the backend infrastructure for a business website using Laravel, resulting in improved scalability that supported up to 200 simultaneous user sessions while maintaining optimal performance levels.
- Worked as a React Developer Intern, gaining hands-on experience in backend web development, contributing to three major projects that improved deployment efficiency by 25%.
- Developed dynamic leave management software, utilizing React for the frontend and Laravel for the backend.

### Neat Wind Industries Limited — CNC Operator — November 2021 to June 2022

- Specializing in CNC machine operation and quality control, resulting in a 15% decrease in production errors and enhancing precision in machining tasks.
  - Proficient in interpreting technical blueprints and specifications, ensuring accurate part production for over 40 different components with a 100% compliance rate on quality standards.
  - Expertise in selecting, installing, and calibrating appropriate tools, optimizing cutting speeds, and determining feed rates tailored to various materials and job requirements.
