SUMMARY

Enthusiastic and motivated front-end developer with hands-on experience in creating responsive web and mobile applications using HTML, CSS, and JavaScript. Proficient in modern frameworks such as React.js and state management tools like Redux. Eager to apply my skills in developing optimized, reusable code while ensuring cross-browser compatibility and a seamless user experience.

SKILLS:

- HTML/CSS
- Responsive Web Design
- JavaScript
- React.js
- Laravel

- Bootstrap
- Visual Studio
- Version Control (Git)
- Redux
- Postman

EXPERIENCE:

YCS Techsoft Pvt. Ltd. — Intern Front End Developer — November 2023 - Present

- Independently designed and developed the backend system for a restaurant website using Laravel, resulting in a 30% reduction in order processing time and supporting over 100 daily user requests.
- Architected and implemented the backend infrastructure for a business website using Laravel, resulting in improved scalability that supported up to 200 simultaneous user sessions while maintaining optimal performance levels.
- Worked as a React Developer Intern, gaining hands-on experience in backend web development, contributing to three major projects that improved deployment efficiency by 25%.
- Developed dynamic leave management software, utilizing React for the frontend and Laravel for the backend.

Neat Wind Industries Limited — CNC Operator — November 2021 to June 2022

- Specializing in CNC machine operation and quality control, resulting in a 15% decrease in production errors and enhancing precision in machining tasks.
- Proficient in interpreting technical blueprints and specifications, ensuring accurate part production for over 40 different components with a 100% compliance rate on quality standards.
- Expertise in selecting, installing, and calibrating appropriate tools, optimizing cutting speeds, and determining feed rates tailored to various materials and job requirements.

PROJECTS:

Leave Management Software

- Developed dynamic leave management software using React and Laravel, facilitating leave management for around 220 employees.

- Created and implemented features that enable employees to submit and track leave requests, with a processing time of under 1 minute per request.

- Integrated an admin dashboard that allows managers to review and approve or reject leave requests, streamlining the approval process with a reduction of 60% time.

Restaurant Website backend project

- Independently expanded the backend system for a restaurant website using Laravel, efficiently handling around 100 average user requests daily.

- Designed a robust database structure that managed over 160 menu items and customer orders, ensuring optimal performance and organization.

- Created APIs for seamless integration with the frontend, enabling real-time updates for order status and item availability.

- Ensured high system security and performance, with an API response time of under 0.50 seconds.

EDUCATION:

Savitribai Phule Pune University

Bachelor of Engineering in Mechanical Engineering **July 2021**
CGPA: 8.05

MSBTE

Diploma in Mechanical Engineering **July 2018**
Percentage:67

CERTIFICATIONS:

Systems Applications and Products in Data Processing (SAP MM)

Certified in SAP MM Module **Jan 2023**
